ABOUT ME

Computer Science graduate passionate about Full Stack Web Development with hands-on experience in the MERN Stack (MongoDB, Express.js, React.js, and Node.js). Skilled in building responsive web applications, REST APIs, and database-driven applications. Proficient in Python and have a basic understanding of Generative AI, LLMs, and prompt engineering, while actively learning and exploring AI technologies. Familiar with Git, GitHub, and cloud computing. Eager to contribute as a Frontend Developer, Backend Developer, Full Stack Developer, or AI/GenAI Developer while continuously learning modern technologies.

EDUCATION

Guru Gobind Singh College of Engineering and Research, Nashik

Bachelor of Computer Engineering

2022 – 2026

Nashik, Maharashtra

PROJECTS

SmartHire - Resume Screening & Candidate Ranking System | Next.js, React.js, Node.js, Express.js, MongoDB, Prisma

- Built a full-stack resume screening platform that extracts candidate skills, education, experience, and contact details from uploaded resumes.
- Developed a candidate ranking system that matches resumes with job descriptions and displays ranked results through an interactive recruiter dashboard.

Personal Expense Tracker & Budget Manager | Python, Flask, HTML, CSS, JavaScript, SQLite, Chart.js

- Developed a personal finance management application to track income, expenses, and monthly budgets with secure user authentication.
- Built an interactive dashboard for expense tracking, budgeting, financial analytics, and Chart.js reports.

AI-First HCP CRM Interaction Logger | React.js, Redux Toolkit, FastAPI, PostgreSQL, LangChain, LangGraph, Groq, Redis, Docker, AWS

- Built an AI-powered HCP CRM platform for managing doctor interactions, profiles, follow-ups, and engagement insights.
- Developed multi-agent AI workflows using LangChain and LangGraph for interaction analysis, sentiment detection, HCP resolution, and automated follow-up recommendations.

Daily Scheduler - Employee Attendance Management System | Next.js, FastAPI, TypeScript, Python, PostgreSQL, daily-scheduler-web.vercel.app

- Built a full-stack attendance system for remote teams with employee check-in/out, leave management, and HR administration.
- Implemented role-based access, real-time attendance tracking, automated processing, and Excel reports to reduce HR workload.

INTERNSHIP

Kyron Data Tech

20 Aug 2026

• **Software Engineering Intern — MCP Server Development**

Remote / Himachal Pradesh

- Working on software engineering projects focused on Model Context Protocol (MCP) server development and AI-related applications.
- Developing and integrating MCP server components using Python and modern software engineering practices.
- Working with APIs and software tools to build practical AI-enabled solutions and improve application workflows.
- Collaborating on assigned development tasks, testing implementations, debugging issues, and maintaining project code and documentation.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, SQL
- **Web Technologies:** HTML5, CSS3, REST APIs, Tailwind CSS
- **Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js, Django, Flask
- **Databases:** MongoDB, MySQL, PostgreSQL, Neon
- **Tools & Platforms:** Git, GitHub, VS Code, Jupyter Notebook, Google Colab
- **Cloud & Deployment:** AWS, Vercel, Render
